

Semen Analysis

Please follow these instructions carefully

Instructions:

1. Collect specimen a minimum of 2 days and a maximum of 7 days after your last ejaculation.
2. Collect the ENTIRE sample by means of masturbation. Other methods, such as interruption of intercourse, are not suitable as there can be loss of the first portion of the specimen.
3. DO NOT use condoms, artificial lubricants, talcs, etc, as these will interfere with the test.
4. Collect the specimen in the specially provided container.
5. Label container with your:
 - Surname
 - Given Name
