

T2[™] Corporate Gift Collection

A little about us

All we do, all we are, revolves around our love for reimagining and reinventing the humble tea leaf.

Born and brewed in Melbourne more than twenty years ago, these days you'll find us in premium grocers, high end boutiques and departments stores across Australia and New Zealand. We're serving up tea with a twist, bringing a little luxury into everyday moments, and creating the chance to stop, sip and enjoy.

Your favourite tea is B Corp certified

As a brewing force for good, every cup of T2 is an opportunity to have a positive environmental impact. We are proudly part of a global community of over 3,000 companies doing business that puts place to planet first by reducing inequality, lowering levels of poverty, creating healthier environments, building stronger communities and imbuing jobs with dignity and purpose.

Tea

Our tea is 100% sustainably sourced. From fruits to spices, tea leaves to herb bushes – all our tea has one or several third party accreditations that confirm its sustainable origins.

Teabags

Our teabags are made from plant-based sources, which means they're fully biodegradable and compostable (yes, even the tag and string!)

Teawares

Our teawares are 100% ethically sourced. All of our suppliers meet the auditing standards of Sedex Members Ethical Trade (SMETA) or Business Social Compliance Initiative (BSCI).

Poly Bags

What about those clear plastic polybags your tea comes in? They're made from plant-based sources and can go straight into your home compost.

Boxes

Our paper boxes are FSC® certified and for every tree harvested, four new seedlings are planted.

This little logo is your peace of mind that the paper used to make this box comes from forests that are managed in compliance with strict environmental, social and economic standards.

The whole leaf and nothing but the leaf

What makes T2 teas a cup above the rest?

We use whole tea leaves rather than low grade tea dust or fannings. This means you get a brew with a complex flavour profile. From the first sip to the last, you'll experience a multitude of flavour notes and subtle changes. Whole leaves with minimal breakage have retained their essential oils and flavour compounds, meaning you get a cup of tea that actually taste like tea!

Supreme sourcing

We work directly with suppliers to develop our own blends from scratch – they're not just the run-of-the-mill blends any tea company can buy, and there could be up to 6 rounds of samples before we settle on a blend we're happy with.
