

A GUIDE TO THE INTERTEK SAI GLOBAL BPIR VERIFICATION PROGRAM FOR BUILDING PRODUCTS IN NEW ZEALAND

We understand the challenges businesses face in navigating the complex landscape of Building Product Information Requirements (BPIR) compliance. Our comprehensive BPIR services are designed to ensure a smooth and efficient compliance for you and your organisation.

WHAT IS BPIR

Building Product Information Requirements (BPIR) are a comprehensive set of requirements. These requirements are stipulated by MBIE (New Zealand), whom defines the essential information and documentation necessary to be provided to consumers for designated building products.

KEY COMPONENTS

The BPIR regulations only apply to designated building products that are manufactured in or imported into Aotearoa New Zealand on or after 11 December 2023. This is underpinned by 3 main components:

Product Specifications

Detailed information about the product's composition, dimensions, and technical attributes.

Building Code Compliance

Documentation confirming how it is expected the product will contribute to relevant Building Code clauses. E.g. example this may be via relevant test reports or certifications.

Comprehensive Data

BPIR covers all aspects of a building product's lifecycle. E.g. installation, maintenance etc.
