

# Cybersecurity Threats

## Is Your Business Prepared for an Attack?

The pandemic has created new cybersecurity challenges for businesses as they adapt their operating model for remote working.

Cyberattacks are inevitable. Responding appropriately to an attack is not just the responsibility of your IT department - everyone in the organisation has a role to play.

47%

of individuals fall for phishing scams while working from home.<sup>1</sup>

Cyberattacks using previously unseen malware or other methods.<sup>2</sup>

> 500k Individuals

Affected by cybersecurity breaches, between February and May 2020, in which personal data from video conferencing users was stolen and sold on the dark web.<sup>3</sup>

of organisations have not assessed their cyberattack response readiness, meaning the first time they test their plans is in the middle of a cyberattack.<sup>4</sup>

1. Psychology of Human Error report | 2. COVID-19 Cyberattack Analysis | 3. BleepingComputer | 4. Ponemon Survey

65% of consumers view data privacy as the most important attribute when considering trust.

Regardless of information type, Information Security can include paper-based and electronic formats and determines how information is processed, stored, transferred, archived and destroyed.

Certification demonstrates your systems have been independently assessed, and you are committed to IT security and ICT Governance.

## Information Security:

Everyone In The Organisation Has a Role to Play.

### IT Department

Ensure company software & hardware (such as mobile phones, laptop, etc.) are protected & secure.

### Payroll Department

Ensure sensitive employee information is protected & secure.

### Sales and Marketing Department

Utilise data to enhance products & service offering. Protecting customer data & privacy is of utmost importance.

### Human Resources Department

Protect employee information. This includes having a robust onboarding & offboarding process.

### Legal Department

Protect sensitive information & ensure compliance against relevant privacy acts & legislations.

### Finance Department

Protect creditor, supplier & client information, as well as sensitive customer data.
