

PEAKING INTEREST IN OUR MOUNTAINS

Communities across the Victorian Alpine Resorts are sharing their environmental discoveries on the peaks of Mt Hotham, Mt Buller/Stirling, Mt Baw Baw, Falls Creek and Lake Mountain.

To share your discoveries simply take a photo of an animal or plant you see while in the Resorts and upload them on

by scanning the QR code below

Your observations contribute to a broader database of citizen science observations that will be utilised by Resort Management, scientists, researchers and other land managers to conserve our unique alpine environment.
