

Slime Time!

Make your own glitter slime with a helping hand from your favourite grown up.

Ingredients

- Plain white or clear craft glue
- 1 teaspoon of Borax
- Food colouring or acrylic paint
- Glitter
- 1/2 cup of warm water

These items can be purchased from Woodgrove Coles or Woolworths.

Step 1

Squeeze your chosen amount of **glue** into a bowl, start with around 1/2 cup.

Step 2

Add a drop or two of **food colouring** [or paint] - you don't need much! - and set aside.

Step 3

Make your slime 'activator' by mixing 1 teaspoon of Borax with 1/2 cup of warm water and dissolve.

Step 4

Slowly add your activator to your glue and **start mixing**. Continue to add activator and mix, once your slime isn't sticking to the bowl it's time to go in with your hands!

Step 5

Add your glitter and taa daa, your glitter slime is ready for you to play with!

Did you know?

Slime is considered to be a non-Newtonian fluid, it behaves like a solid and liquid at the same time!
