

CAPTURE ONE FOR THE CHANCE TO WIN\* A \$200 HYPERDOME GIFT CARD

**WELCOME TO THE ILLUMINATING WORLD OF MINI BEASTS**

A Neon Cuckoo Bee that hums. A Swallowtail butterfly that knows when you're near. An Australian Jumping Spider. And the singing Cicada are all waiting for you at Hyperdome Shopping Centre. But one thing they won't do is bite. So get up close and get to know all the insects creeping around 2 to 26 October.

**CAPTURE ONE AND WIN\***

Every Mini Beast is bright and rare so don't be afraid to take plenty of pictures with each one. You could even WIN\* a \$200 Hyperdome Shopping Centre gift card by sharing one of your photos on Instagram. Be sure to tag us! @hyperdomeshoppingcentre

**EXPERIENCE MINI BEASTS FUN ONLINE AND IN PERSON**

The insect fun can continue on at home, with FREE downloadable Mini Beasts Craft Packs. From dot to dot, colouring in games, find-a-word puzzles and more are waiting for you. Visit hyperdomeshopping.com.au

\*Terms and conditions apply.

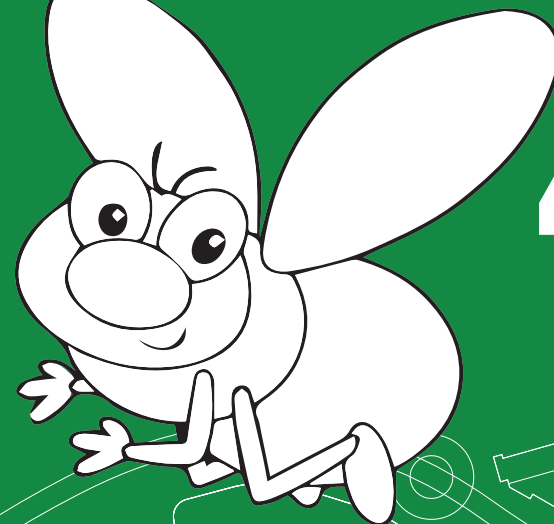

**LEARN MORE ABOUT THE MINI BEASTS**

1

**NOT ALL SPIDERS BUILD WEBS.**

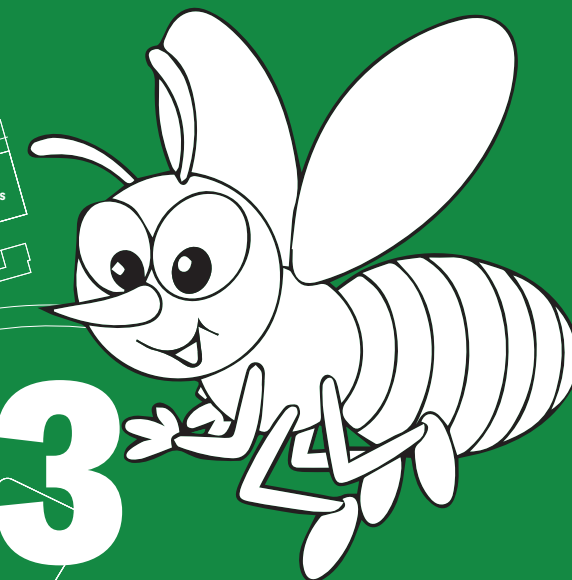

Jumping spiders are smaller than most. But what they lack in size, they make up with powerful back legs which also help them move very fast. They also have excellent vision to judge distance to track, stalk and leap on prey before they can get away. Get near our Mini Beast spider and see if it sees you.

4

**WHY DO CICADASSING?**

Some cicadas sing to scare birds away - and to not be eaten by them. All male cicadas, from all species however, sing to attract female cicadas. It's a skill they perform well and can be heard by cicadas across every continent. Even our Mini Beast cicada sings!

3

**DID YOU KNOW BLUE BEES EXIST?**

If you've ever seen a blue insect that looks like a bee and wondered what it was, chances are it is in fact a cuckoo bee. These black and aqua blue bees trick other bees into looking after their young by laying their eggs in other bees' nests. Don't let our Mini Beast cuckoo bee get past you. Hover your hand over it's antenna and see how it reacts.

2

**THE LARGEST BUTTERFLY IN TOWN.**

If you're ever in Brisbane, keep an eye out for the biggest butterfly there. That's the female Orchard Swallowtail Butterfly. Females have a wingspan of about 14cm while males are smaller measuring 12cm across. Our Mini Beast Swallowtail is keeping an eye out for you. So move next to it and see what happens!

Grab your pencils, these pictured Mini Beasts are ready for some colour!
