NEW REDVISION TOTAL VEHICLE MANAGEMENT SYSTEM

THE POWER OF
REDARC[®]

Being on the road is great, and now it's even easier to keep an eye on everything with the RedVision Total Vehicle Management System from REDARC. The award-winning RedVision system gives you an unprecedented level of control and automation for your overlanding vehicle, travel trailer or van.

CONTROL

Turn devices on or off, such as lights, water-pumps, TVs, electric steps, fridges, compressors, inverters and more. This reduces the need for multiple switch panels which, in turn, allows for more storage space. Additionally, RedVision is compatible with a range of other REDARC products including In-vehicle Battery Chargers, Smart Start[®] Smart Battery Isolators, and the Manager30 Battery Management System.

MONITOR

RedVision allows monitoring of up to six water tank levels, two independent temperature levels, like ambient and fridge temperatures, and will monitor auxiliary battery usage and charging information when paired with the Manager30.

This means you can keep an eye on all the essentials in real time and remain on top of things before it's too late.

AUTOMATION

RedVision can be programmed to control multiple devices automatically and act as a master switch. As an example, simply hit one button and turn everything off and just leave the fridge running.

ALL IN ONE PLACE

The display and app each incorporate modern, user-friendly interfaces with easy to navigate menus. The display is the main user interface for RedVision. The robust 4" color LED display has been built and tested to withstand North America's tough, rugged and varied environmental conditions. It features soft key buttons on either side of the screen which can be programmed to control multiple inputs.

CONFIGURE

Download the RedVision Configurator App to take full control of your device inputs, output channels and control logic.

GET THE REDVISION APP

Monitor and control your loads from your cellphone using the RedVision app, which is compatible with most phones and devices running iOS 11.1, Android 7.0, and Bluetooth 4.0 or later.

Search for RedVision to download.

REDVISION MANAGER30 KIT

TVMSKIT05-NA (TVMS1280-NA and BMS1230S3-NA)

Combining the innovative, award-winning RedVision Total Vehicle Management System and the iconic Manager30 Battery Management System, this kit provides instant feedback on your auxiliary battery and electrical system.
