- 100% agreed it provides a light, smooth application with long-lasting ultra-hydration
- 96% saw visibly smoother skin around the eye after continued use

Key ingredients

Glacial Water: Ultra-pure, intensely hydrating and rich in mineral trace elements

Nordic Antioxidant Complex: Skin-stabilizing oils of organic cloudberry, lingonberry and sea buckthorn absorb quickly to provide antioxidant benefits. Vitamin C helps energize dull complexions. Antioxidants and essential fatty acids protect the skin while helping to improve the skin's appearance, reduce the appearance of fine lines and wrinkles, and lock in moisture, leaving skin hydrated, plump and supple.

Probiotic extract (Lactobacillus Ferment Lysate): Helps to reinvigorate and renew skin tone with increased hydration. Protects the skin's microbiome from external factors and keeps it balanced and renewed.

Demo tips

- Point out that the thin skin around the eye is one of the first places fine lines start to appear. You want to take care of this area sooner rather than later.
- Explain that keeping the eye area hydrated is an essential step in creating younger, healthier-looking skin
- Pump out some of the Renewing Eye Cream and let Customers see the texture and smell the product. Unlike other eye creams, this product does not include any harmful chemicals or fragrance that can irritate the delicate skin around the eye.
- Remind guests of the core steps of any regimen: Cleanse, treat, moisturize and protect. While a variety of factors determine the needs of any individual, the most benefit comes from daily attention to these four areas.
- Mention Norwex's focus on clean beauty. Point out these products enhance your skin with targeted treatments inspired by a rich heritage of Norwegian purity and health. Clean, natural ingredients honor your skin's unique microbiome as they hydrate, nourish and balance.

Did you know

- Like the rest of the body, skin is repaired, restored and regenerated mainly during sleep. This is why night creams are generally thicker and heavier; they are designed to be absorbed over several hours.
- Eye cream isn't just for your mom! Experts recommend beginning the use of eye cream in your 20s since this is when signs of aging (like crow's feet and eye wrinkles) can start to appear.
