

# Microfiber + Bamboo Reusable Rounds

A superior, sustainable replacement for single-use cotton rounds. They provide smoother cleansing, whether used with water alone or paired with Norwex Cleansing Facial Powder.

**limited-edition**

Item #: 326001

Rounds: 6.5 cm / 2.6" diameter (set of 10)

Mesh bag: 16.51 cm x 15.24 cm / 6.5" x 6"

## The problem

The beauty industry generates significant waste, with billions of disposable cotton rounds ending up in landfills every year. The production of conventional rounds often requires harsh chemicals, which leave an environmental footprint that's anything but beautiful. While some reusable options exist, they often fall short in durability and performance.

## Norwex solution

Microfiber + Bamboo Reusable Rounds combine sustainability and functionality. Made with FSC-certified bamboo and superior Norwex Microfiber, they offer a guilt-free way to care for your skin while helping to protect the planet. Designed to last longer and require less laundering, they're both budget- and planet-friendly. They deliver superior cleansing, are gentle on sensitive skin and help reduce environmental waste. Each set comes with a mesh laundry bag for easy care, ensuring your rounds stay fresh and ready for daily use.

## Why they're better

- A more sustainable replacement for single-use cotton rounds and disposable wipes
- Designed especially for delicate facial skin
- Made with Forest Stewardship Council (FSC)-certified bamboo and ultra-soft microfiber for a gentle yet effective cleansing experience
- Rounds last longer with less frequent laundering – just rinse, dry and reuse
- Zippered mesh laundry bag doubles as a convenient carrying pouch
- Removes daily buildup of oils and dirt
- BacLock\*, our exclusive micro silver agent, protects the cloth by inhibiting odor in the cloth, which means it's ready to use again and again

## What your customers will love

- Can be used for facial cleansing with water alone or to apply skin care products like serums
- Molds to your face for a superior cleansing experience
- Saves money and helps protect the planet from environmental waste
- Elevates your skin care routine while contributing to a cleaner, safer, better world
- Great for all skin types, including oily, dry, sensitive and mature
- Microfiber is made from recycled microfiber yarn

## How to use

- Use daily to cleanse with water alone or with Cleansing Facial Powder
- Can be used with serums, witch hazel or toner
- Not for use with nail polish remover

## Caring for reusable rounds

- Rinse under water and let dry between uses
- At the end of the week or as needed, wash Reusable Rounds in the mesh laundry bag using a Norwex laundry detergent
- For tough makeup stains, pretreat with Laundry Stain Remover before laundering
- Do not use bleach. Do not use fabric softener or dryer sheets when laundering microfiber as these additives coat the surface of the fibers.
- For best results, machine dry. Can also be hung to dry.

(continued on next page)

 BacLock\* is an antimicrobial agent solely intended to protect and self-clean the cloth by inhibiting growth of odor-causing bacteria, mold and mildew. BacLock does not protect people from disease-causing pathogens.

All Norwex Microfiber products carry a two-year warranty. Please visit [www.norwex.com/product-guarantee](http://www.norwex.com/product-guarantee) for complete details.

### Did you know

- It takes 10,000 liters (2,641 gallons) of water to produce one kilogram (2.2 pounds) of cotton  
<https://www.theworldcounts.com/challenges/consumption/clothing/cotton-farmingwater-consumption>
- Because cotton is very pesticide-intensive, it's called the dirtiest crop in the world  
<https://www.theworldcounts.com/challenges/clothing/world-cotton-production-statistics>
- According to Businesswaste.co.uk, about 11 billion wet wipes are flushed or thrown away every year. They can take up to 100 years to biodegrade.
- Despite their plush cotton feel, disposable makeup wipes actually contain a mix of plastic fibers such as polyester and polypropylene, which prevent them from biodegrading
