

DETOX + RESTORE

Hydrating Night Cream

Supports your skin's microbiome and helps detox and restore it from environmental stressors as you sleep.

Benefit

Our Nordic antioxidants nourish and help detoxify skin, removing free radicals and pollutants while protecting skin from environmental stressors.

Why be concerned about the effect of free radicals, pollutants and environmental stressors?

Free radicals are atoms that are missing an electron and attack healthy cells to steal an electron. This can set off a process called oxidative stress.

How do antioxidants help improve skin appearance?

Antioxidants help protect the skin from free radicals.

Benefit

Specially formulated with anti-aging, skin-loving antioxidants and adaptogens.

Which ingredients provide these benefits?

Anti-aging, skin-loving antioxidants and adaptogens include CityStem™, Nordic mushroom blend, niacinamide and Nordic antioxidants.

Benefit

Rich night cream feels luxurious to the touch and helps skin feel hydrated and healthier. Skin feels instantly and deeply hydrated.

What are the hydrating ingredients?

Hydrating ingredients include Nordic mushroom blend, Nordic antioxidants, Adansonia Digitata (Baobab) seed oil and glacial water.

Benefit

Skin feels softer.

Which ingredients provide this benefit?

Skin-softening ingredients include upcycled avocado oil, CityStem, sodium acetylated hyaluronate, sodium hyaluronate, hydrolyzed sodium hyaluronate and sodium hyaluronate crosspolymer.

Benefit

USDA certified 91% biobased content from plants and other renewable sources.

What makes a product biobased? And why is that important?

Biobased looks at the amount of "new" organic carbon versus "old" organic carbon. New organic carbon comes from plants and other biologic processes (like fermentation), which are renewable. Old organic carbon is from petroleum or coal and other non-renewable resources. The objective of biobased materials is to use renewable resources, like corn, sugar and other plants, to make products instead of non-renewables.

The biobased content is measured using a test method (ASTM D6866), which can accurately identify how much of the carbon content in the product is from renewable sources.

This percentage does not include the water, or other inorganic materials, in the formula. Norwex is passionate about using cleaner, safer, renewable plant- and agricultural-based materials to replace petroleum. Moving away from petroleum can reduce greenhouse gases while creating economic opportunity for farmers.

Benefit

Skin appears brighter and more radiant.

Which ingredients provide this benefit?

Skin-brightening ingredients include niacinamide, CityStem, Nordic antioxidants and adenosine.

Benefit

Skin feels bouncier.

Which ingredients provide this benefit?

These ingredients include upcycled avocado oil, Nordic mushroom blend, sodium acetylated hyaluronate, sodium hyaluronate, hydrolyzed sodium hyaluronate and sodium hyaluronate crosspolymer.

BENEFITS OF Hydrating Night Cream

Benefit

Skin tone appears more even.

Which ingredients provide this benefit?

Skin-toning ingredients include niacinamide, CityStem, Nordic antioxidants and adenosine.

Benefit

Smooths the appearance of fine lines and wrinkles.

Which ingredients provide this benefit?

Skin-smoothing ingredients include Nordic mushroom blend, Nordic antioxidants, niacinamide, sodium acetylated hyaluronate, sodium hyaluronate, hydrolyzed sodium hyaluronate and sodium hyaluronate crosspolymer.

Benefit

Tightens the appearance of pores.

Which ingredient provides this benefit?

Niacinamide helps pores appear tighter.

Benefit

Helps restore skin overnight with intense hydration, supports the skin's microbiome and detoxes skin from environmental stressors as you sleep.

Which ingredients provide these benefits?

These benefits are provided by CityStem, Nordic mushroom blend, Nordic antioxidants, Adansonia Digitata (Baobab) seed oil, glacial water, inulin and fructose.

Benefit

This product is recommended for all skin types.

How was this tested?

This product was dermatologist RIPT-tested for allergy and irritancy. Not tested on animals.

Benefit

Airless pump reduces product waste.

What are the advantages of an airless pump?

How does it work?

Without exposure to air, the product inside is less prone to degrade so it lasts longer. Plus the airless pump ensures every last bit of product is removed from the bottle, thereby eliminating waste.

Benefit

Refillable packaging saves money and means less waste in the environment.

How is Norwex packaging environmentally friendly?

We're reducing our collective carbon footprint by helping everyone reduce waste at home. Our refillable skin care products allow you to easily pop in a refill of your favorite product without tossing the whole bottle, reducing landfill load, which is better for the environment.

Benefit

Yields approximately 83 pumps per container.

You can expect 83 – 166 uses, depending on how much you use. You can expect a jar to last two and a half to five months if you use one-half to one full pump once a night, every night.

Benefit

Hydrating Night Cream is available in our AutoSave program.

The exact timing depends on how much and how often you use it. We recommend recording the date you received your product on the refill cartridge to track your personal usage timing.

Benefit

CityStem™ protects skin from pollutants and neutralizes toxic oxidants that can damage proteins and lipids. It works overnight to reverse the effects of pollution, detoxifying and strengthening the skin's natural barrier.

What is CityStem?

CityStem is another name for white horehound extract.

BENEFITS OF Hydrating Night Cream

Benefit

Our adaptogenic mushroom blend (chaga, tremella and cordyceps) is rich in natural moisturizing properties. It's combined with three molecular weights of hyaluronic acid to deliver long-lasting moisturization to the skin's outer layers.

What does an adaptogenic do for your skin?

Adaptogens can help protect skin from environmental stressors.

Benefit

Nutrient-rich upcycled avocado oil (Persea gratissima) avocado fruit extract) helps plump and detoxify the skin.

How are upcycled ingredients good for the environment? And how do avocados benefit skin?

Upcycled ingredients are typically byproducts from the production of another material and would normally be discarded as waste. Incorporating them into other products is a more sustainable practice.

Avocado oil is moisturizing oil full of nutrients that nourish and soften the skin.

Benefit

Skin-stabilizing oils of organic cloudberry, lingonberry and sea buckthorn in our Nordic blend absorb quickly to provide antioxidant benefits. Vitamin C helps energize dull complexions. Antioxidants and essential fatty acids protect the skin while helping to improve the skin's appearance, reduce the appearance of fine lines and wrinkles, and lock in moisture, leaving skin hydrated, plump and supple.

Benefit

Adenosine supports skin health as it soothes and restores. Often used in Korean skin care, it gives you a smoother, more youthful-looking complexion.

How does adenosine work?

Adenosine supports skin health, thanks to its soothing, skin-restoring and skin-energizing properties.

Benefit

Natural prebiotics inulin and fructose are proven to help rebalance the skin's microbiome by nourishing the skin barrier. Inulin is a polyfructose extracted from chicory root that works to selectively support the skin's natural flora.

What is the microbiome? And why does it need to be balanced?

The skin is home to a microscopic community of organisms that act as a shield against external factors like pollution and harsh cleansers. This is known as your microbiome; if it's compromised, it can lead to dryness and irritation. Pre- and probiotics help nourish the skin's microbiome and keep it balanced.

Benefit

Niacinamide is an anti-aging ingredient that reduces the appearance of fine lines, wrinkles and pores while improving skin clarity, evening skin tone and restoring radiance.

Intensely moisturizing Adansonia digitata (baobab) seed oil is a rich oil from the baobab tree in Zimbabwe. It's loaded with antioxidants, vitamins and omega fatty acids to nourish and deeply hydrate the skin.

Benefit

Our sodium hyaluronate blend provides instant hydration to thirsty skin and helps skin appear more youthful and supple.

How does sodium hyaluronate work?

Sodium hyaluronate is a form of hyaluronic acid, a natural substance found in the skin. It has excellent hydrating properties, as it can hold up to 1,000 times its weight in water. Sodium hyaluronate helps to moisturize the skin, reducing the appearance of fine lines and wrinkles.

Benefit

Glacial water is ultra-pure, intensely hydrating and rich in mineral trace elements.

Why is glacial water superior? And how is it sourced?

Originating in Canada, the glacial water sourced for our products is collected from a spring; no glaciers are melted during harvesting. Water is collected from natural spring runoff, similar to spring waters bottled for consumption around the world.
