

# HORIZON M-SERIES & C-SERIES: TRANSLUCENT CANOPY SYSTEMS

Polycarbonate Canopy Systems Built for Daylight and Durability

The Horizon canopy series delivers a lightweight, impact resistant canopy, constructed with translucent polycarbonate glazing for superior strength and durability. Offering daylight and shelter from the elements, these long-lasting canopies create beautiful entrances and covered walkways.

## Features and Benefits:

- Ideal daylighting solution for shelters, entrances, and covered walkways
- UV stable polycarbonate glazing provides long-lasting, maintenance free aesthetics
- Safe, lightweight polycarbonate construction offers high impact resistance
- Provides natural daylight transmission to assist pedestrian visual acuity
- Contemporary, streamlined appearance with hidden fasteners, gaskets, sealants and horizontal joints
- Available in a multitude of configurations and color options for an economical, sleek alternative to glass
- Skin system compatibility with fixed and adjustable sill components
- Five-year warranty on workmanship and glazing and up to 20-year coverage on finish

### M-Series Canopy:

- Monolithic canopy features  $\frac{3}{8}$ " thick polycarbonate to provide 250 times the impact strength when compared to glass
- Capable of spanning a continuous length of up to 12' per sheet with optional joint sealant construction extending lengths up to 20'

### C-Series Canopy:

- Constructed with 20mm standing seam multiwall polycarbonate panels that can span lengths of up to 39'
- Modular panel system, shipped fully fabricated for easy, on-site assembly
- Constructed with snap on batten assembly and concealed clips for simple, fast installation

## Code Compliance:

- Flame Spread - UL 723
- Smoke Development - UL 723
- Glazing Material - Fire Rated and Hail Resistant

## Ideal Applications:

Education

Airports and  
Railway Stations

Healthcare

Retail and Shopping Malls

Hotels and  
Conference Centers

& Many More
