

Coalition Control[®]

Detect, assess, and mitigate your company's risk

Coalition Control[®] is the industry's leading cyber risk management platform, powered by the same proprietary technology and data used to underwrite and protect 90,000+ policyholders, that can help you detect, assess, and mitigate cyber threats before they turn into attacks. We leverage machine learning and AI to analyze live data and scans from public data sources alongside our proprietary incident, claims, and infosec data to create the most actionable, comprehensive view of your cybersecurity posture and which active security issues are most likely to be exploited.

In addition to proactively detecting these cyber threats, Control guides you through mitigating them before they turn into attacks — with expert guidance, self-service remediation steps, our own security solutions, and a network of trusted cybersecurity partners.

Active Insurance policyholders receive full access to Control and can learn more or log in at coalitioninc.com/control.

The screenshot displays the Coalition Control dashboard for 'Company, Co.'. The main navigation sidebar includes: Home, Security Checklist, Security Findings, MDR Alerts, Attack Surface, Security Training, Third Party Monitoring, Financial Monitoring, Integration, Marketplace, Insurance Policy, and Coalition Services. The 'Ask AI Assistant' button is visible at the bottom of the sidebar.

The main content area is divided into several sections:

- Your Coalition Security Profile:**
 - Cyber Health Rating:** 78 / 100 (Good). This represents your external security findings and exposures detected from Coalition scans.
 - Inherent Risk Rating:** Low. This represents the risks you can't control — like your employee count.
- Your Action Plan:**
 - Immediate action required:**
 - Zero Day Alert: Update CrushFTP to avoid being hacked.
 - Then complete these actions:**
 - Resolve 2 critical external security finding.
 - Help your team prevent cybersecurity incidents with Security Awareness Training.
 - Sign up for Managed Detection and Response (MDR).
- Security Findings:**
 - External Findings:** 14 Total Findings, 2 Critical Findings.
 - Internal Findings:** 22 Total Findings, 1 Critical Finding.
- Security Checklist:**
 - Overall progress: 38% (Manual: 17%, Auto-Populated: 21%).
 - Categories: Access Control (2 of 6), Data Backup, Email Security, Endpoint Security, Human Risk, Incident Response, Network Security, Patch Management.
 - Access Control Detail:**
 - Question: Do you have Single Sign On (SSO) implemented in your organization?
 - Text: Single Sign-On (SSO) is a crucial security measure that allows users to access multiple applications with one set of credentials. This reduces the risk of password-related vulnerabilities, simplifies access management, and improves user experience. Implementing SSO can significantly enhance your organization's security posture by minimizing the attack surface associated with multiple login credentials.
 - Options:
 - Yes, and rolled out to all users
 - Yes, but only partially rolled out
 - No, we use usernames and passwords
- Marketplace:**
 - Backblaze:** Avoid data loss and protect your business continuity and data security standards with unlimited computer backup.
 - CrowdStrike:** Stop breaches with the CrowdStrike Falcon Endpoint Protection Platform.
 - Jumpcloud:** Eliminate Identity, Access, and Device Risk.
 - SentinelOne:** Automated endpoint detection and response for rapid defense.
 - Twingate:** Secure network access without the need for VPN.

Key Features

Attack Surface Monitoring (ASM)

Control monitors and detects risks across your entire external digital footprint, including assets, apps and services, data leaks, and phishing risks.

Personalized Cyber Health Rating and Risk Assessment

Control utilizes a combination of attack surface monitoring, proprietary threat intelligence, and patching cadence insights to produce a Cyber Health Rating and a comprehensive report with detailed information into every security finding and its severity, along with a prioritized action plan to help mitigate the risks. Control also provides Inherent Risk Rating offering visibility into external influences such as employee size, industry etc that impact an organization's risk profile.

Third-Party Risk Management

Monitor suppliers and vendors as an extension of your organization that may pose a threat.

Lookalike Domain Management

Receive alerts for any public web domains that might be pretending to be you and request their removal.

Alerting & Security Notifications

Get platform and email notifications of any critical vulnerabilities, including zero-day alerts, we find to help protect your business.

Expert Guidance & Advice

Get detailed security recommendations from our team of expert security and threat analysts to help you address areas of concern quickly and confidently.

On-Demand Rescans

While we rescan your attack surface monthly and update any findings that appear resolved, users can request that we rescan specific vulnerabilities any time, to improve their posture sooner.

Coalition Security Copilot

CoalitionAI Security Copilot can help you gain details on vulnerabilities, understand contingencies, and ask about ways to resolve security issues, providing you with expert guidance and self-service remediation steps to help you mitigate risks before they turn into attacks.

Security Checklist

A streamlined, questionnaire-based guide for small and medium-sized businesses to establish security controls in various areas, such as remote access, emails, devices, network, access control, and incident readiness and assess against cybersecurity frameworks such as National Institute of Standards and Technology (NIST).

Resolve Vulnerabilities with Attestation and/or Evidence

Let us know if or when you've taken steps to address specific vulnerabilities by resolving each with attestation and/or evidence of the measures you've taken, improving your posture and overall risk score.

Internal Risk Monitoring with Integrations

Integrate Microsoft 365, Google Workspace, Amazon Web Services, and SentinelOne to easily access and monitor key security controls across your services from one location. Mitigate security risks associated with unauthorized access, misconfigurations, and more with a unified visibility of cyber risks.

Security Solutions & Services from Our Cybersecurity Partners

Coalition partners with leading cybersecurity companies to offer the right tools to address risks, vulnerabilities, and contingencies. Control users enjoy exclusive savings on these world-class cybersecurity solutions.

An end-to-end cyber risk management platform to help you protect your business

Whether you're a business leader, a risk professional, or a technical user, Coalition Control is the only cyber risk management platform that is powered by the same proprietary technology and data we use to insure and protect hundreds of thousands of businesses, that helps you detect, assess, and even mitigate risks before they strike.

Business Leader

- Gain deep visibility into your infrastructure and attack surface.
- Invite internal and external members of your security and/or IT teams to use ASM and follow security recommendations.
- See your risk easily with intuitive graphs and robust data visualizations.

Security User

- Monitor your attack surface with deep scans of all IP addresses, domains, assets, and ports.
- Get alerts on newly discovered vulnerabilities, including specific zero-day threats, as recommended by Coalition's expert threat analysts.
- Get specific remediation recommendations based on vulnerabilities found on your organization's attack surface.

Risk Professional

- Enjoy exclusive savings from leading cybersecurity vendors including SentinelOne, Okta, and Malwarebytes.
- Get ongoing monitoring to help lower your risk and help reduce the likelihood of loss to your organization.
- Monitor suppliers and vendors as an extension of your organization that may pose a threat.
- Find your organization's credentials that are exposed on the dark web.
- Track your organization's security hygiene over time with powerful data visualizations and tables.

IT User

- See the potential correlation between security vulnerabilities and their exact location(s) on your infrastructure for rapid remediation.
- Use easy-to-follow recommendations that are specific to your organization's attack surface to remediate issues and reduce risk.

Coalition Security Solutions

Coalition Incident Response (CIR*)

CIR is available to Coalition insurance policyholders before, during, and after a cyber event to enable them to respond quickly and decisively to any threats — or the appearance of threats — against their organization.

*Coalition Incident Response services provided through Coalition's affiliate are offered to policyholders as an option via our incident response firm panel.

Coalition Claims Teams

When the worst happens, and a breach or covered event has occurred, the Coalition claims team gets to work right away to mitigate the impact on your organization.

Coalition Managed Detection and Response** (MDR) [Add-on]

Get 24/7 threat monitoring and unlimited remediation from our expert team without breaking your budget. Coalition MDR combines industry-leading endpoint detection and response (EDR) technology, cybersecurity expertise, and insights from our proprietary data sources to respond to threats across endpoint, cloud, and identity security — minimizing or even eliminating the impact of a cyber incident. [Learn more](#)

**Coalition Security Services MDR services are provided by Coalition Incident Response, an affiliate of Coalition, Inc.

Coalition Security Awareness Training (SAT) [Add-on]

Strengthen your employees' cyber defense with engaging training content, real-life stories, and live phishing simulations to help meet compliance and protect your data. A robust training solution, purpose-built for small and medium businesses, Coalition SAT enables you to deliver training within minutes, track and manage your human security risk alongside other cybersecurity risks directly within Control. [Learn more](#)

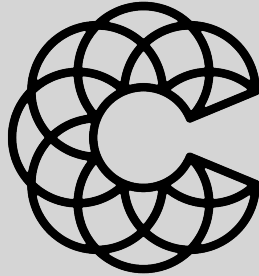

Coalition Cybersecurity Partners

Access unique offers on leading cybersecurity solutions from partners offering world-class technology. Whether your organization needs to secure identities, email accounts, or endpoints, Coalition's cybersecurity partners make it easy to adopt a defense-in-depth security strategy quickly, confidently, and affordably.
