

ConMet is...

A Solutions Provider

We've been driving the commercial vehicle industry forward with transformative solutions since 1964. In fact, ConMet solutions and products are installed as OEM first-fit equipment on virtually all heavy-duty trucks in North America.

People-First

Collaboration and innovation are at the heart of everything we do. We focus on creating an environment where our people can thrive by improving our workplaces and our communities across all our global locations.

Customer Focused

For decades, ConMet has been a trusted partner to OEMs, fleets, Tier 1 suppliers, and the aftermarket. We supply forward-thinking, high-performance solutions that bring value to our customers.

Committed To Sustainability

Today's biggest global challenges require transformative change, and we're committed to doing our part to reduce our carbon footprint and drive environmental sustainability in the commercial vehicle industry.

ConMet offers...

Rewarding Career Opportunities

From our corporate headquarters in Vancouver, Washington, to numerous offices and manufacturing facilities across North America, Europe, and China, we offer a wide variety of excellent career opportunities.

- › Engineering
- › Manufacturing
- › Program Management
- › Sales
- › Quality
- › Marketing
- › IT
- › Accounting/Finance
- › Sourcing
- › Human Resources

Careers at ConMet are filled with innovation, growth, and endless development opportunities. Check out our current openings by scanning the QR code or visiting conmet.com/careers.

Driving
Transformation
From the
Wheels Up

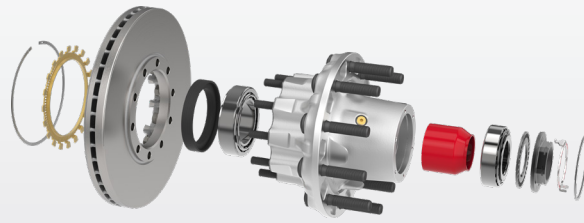

ConMet creates...

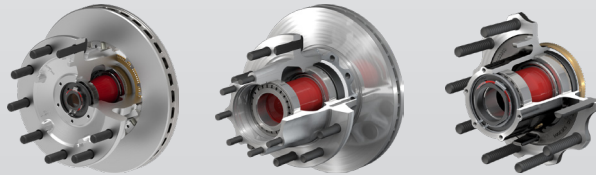

World-Class Wheel Ends

We don't just manufacture wheel ends, we design, validate, and innovate. We continually set the standard for high performing products for our customers and the market – always advancing.

ConMet offers the most complete wheel end product portfolio in the industry.

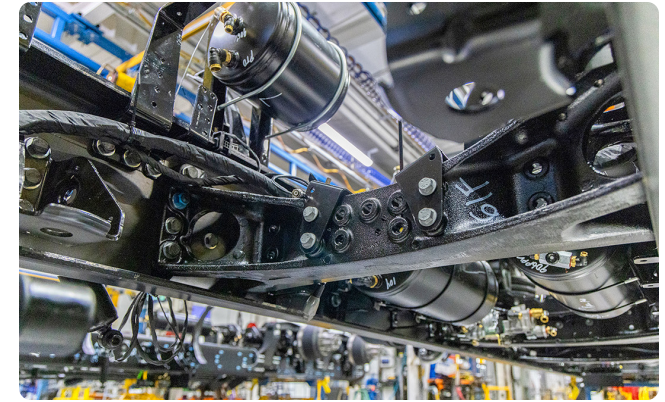

- › **PreSet Plus®:** The complete ConMet proprietary pre-adjusted wheel end.
- › **SmartHub™:** Real-time wheel end health monitoring with actionable insights.
- › **Disc Brake Rotors:** ConMet offers a variety of rotor types covering most applications.
- › **TruTurn®:** Precision-machined, inherently balanced brake drums.

Cast Aluminum and Iron Components

With decades of experience in improving casting processes, we effectively focus on eliminating waste and reducing costs at every level of production. Our robust, reliable manufacturing technology ensures consistent quality.

- › Radiator supports
- › Engine support cross members
- › Cab mounts
- › Fuel tank brackets
- › Rear cross members

Active Aerodynamics

The TruckWings® tractor-mounted aerodynamic device is a new technology in the industry. It automatically deploys to close the gap between the tractor and trailer to increase fuel efficiency and improve stability.

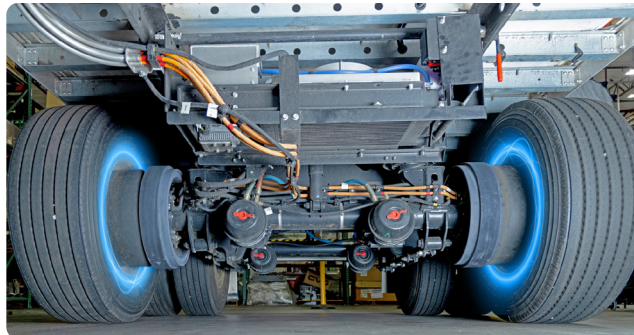

- › 3-6% proven fuel savings
- › 7-10 metric tons of carbon eliminated annually, per truck
- › 18 to 24-month average ROI
- › 1 million miles of life expectancy

Electrification Solutions

The Nmotion TR 160-45, an in-wheel motor system for refrigerated trailers, was first to market in the U.S. Power generation on the road allows for a smaller, lighter high voltage battery while providing power to the transport refrigeration unit (TRU) when needed.

- › Fully electric TRU operation
- › Reduces CO2, PM2.5, and NOx emissions
- › Minimal infrastructure needs for easy integration

Interior and Exterior Plastic Systems

From concept to creation, our team of engineers and plastics experts partner with our customers to design, develop, test, and manufacture solutions tailored to their needs and specifications.

- › Bumpers
- › Grille assemblies
- › Fairings
- › Door panels
- › Cabinets
- › Bunks
