CONMET DIGITAL

DriverApp

Asset Health Insights in the Palm of Your Hand

The Driver App from ConMet Digital brings the power of data to the road. The app provides fleets with an enhanced pre-trip inspection and real-time, in-cab, asset health alerts so drivers can react faster. As a companion to the online ConMet Digital Dashboard, maintenance and service teams see warnings at the same time as the driver, allowing a seamless partnership to increase uptime and safety. The Driver App is available for download on iOS and Android devices.

THE DRIVER APP PROVIDES A HOLISTIC EXPERIENCE TO:*
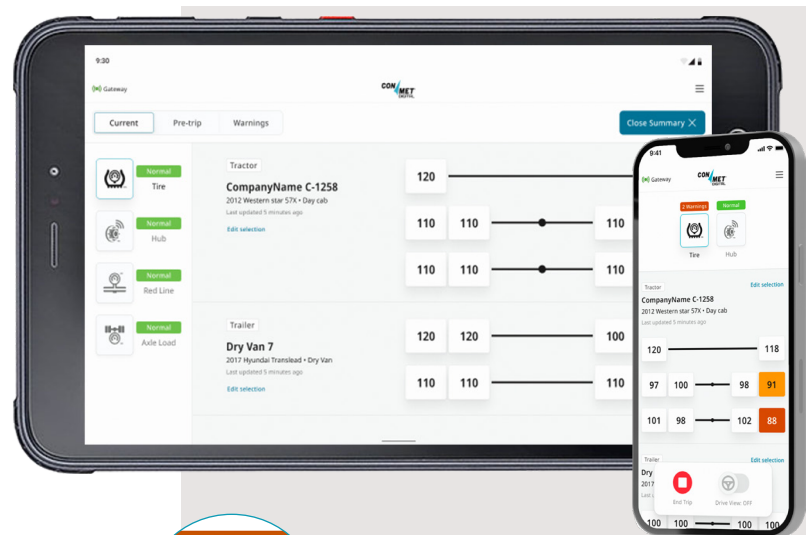

Enhance Pre-Trip Inspections

- ▸ Easily visualize alerts with vehicle diagram
- ▸ Increase uptime by checking tire pressure in seconds
- ▸ Enhance accuracy of pre-trip inspection
- ▸ Locate and correct issues before hitting the road

Visualize Data On-The-Road

- ▸ Custom drive mode to display in-cab asset health alerts while on the road, without distracting drivers
- ▸ Push alerts through smartphone or tablet settings

Easily Integrate Fleet-Wide

- ▸ With the online ConMet Digital Dashboard, the service team and drivers get the same alerts, at the same time
- ▸ Available for tractor and trailer assets, new build and retrofit options

*The ConMet Digital Driver app data should be used as a supplement to a comprehensive maintenance program that includes regular, manual, and visual inspections of assets.

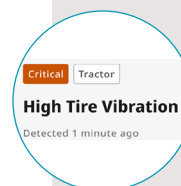

Alerts by level of importance

Orange alerts are for warnings and you should proceed with caution. Critical alerts need attention immediately.
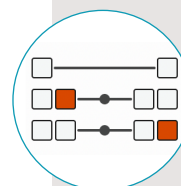

The number of warnings are displayed above the corresponding sensor category.

Easily locate alerts while on the go

Alerts will be associated with either a tractor or trailer asset. It is quickly identifiable in the warning.

Alerts while in drive mode will display an asset chart. The chart will show which component of the asset is affected and the level of alert.

ConMet Digital: Advancing Connected Technologies for Heavy-Duty Vehicles

Streamlining Connectivity
With a single Vehicle Area Network (VAN) that utilizes the latest Bluetooth® Low Energy technology, onboard devices actively monitor an asset's GPS location and the health of critical vehicle components.

Expanding Telematics Solutions
The growing ConMet Digital portfolio, among others, includes SmartAir™ TPMS, SmartTrack™ asset management, SmartHub™ wheel end monitoring, SmartAir™ line pressure monitoring, and SmartAir™ axle load monitoring.

Transforming Raw Data into Real Insights
ConMet Digital's proprietary algorithms combine expert data science and decades of historical data to synthesize raw data, from across the entire tractor-trailer system into simple, actionable alerts.

Featured Product

PRESET PLUS® SmartHub™

▶ Improve visibility of wheel end maintenance needs that can be missed during visual inspections

▶ Advanced warning for conditions that could lead to wheel-off and thermal events if ignored

▶ Maximize the life of all wheel end components

▶ Quickly identify wheel end irregularities such as tread imbalance, blown tires, or tire and hub imbalance
